Communication

PROFILE

PERSONAL SUMMARY An enthusiastic Data Geek who has the ability to effectively find and interpret solutions for key audiences and businesses. With a background in iOS mobile application development and website building and a bachelor's in Information Technology, I am passionate about coming up with creative solutions in order to enable organizations to perform better and make smarter business decisions with a data-driven approach. This is also paired with a curious data mindset, and the ability to ask the right type of questions and apply logic to any business challenge, no matter how daunting it might seem.

WORK EXPERIENCE

Supervisor, Data Scientist and ML Engineer   Nov-2022 - Now
Ezecom

At Prudential, I served as a Data Scientist, orchestrating a comprehensive approach to data-driven decision-making. I seamlessly integrated BI tools and advanced analytics, implementing an automation process using Python to streamline the data flow. SQL proficiency facilitated efficient data extraction and transformation, enhancing the overall analytical efficiency.

Business Intelligence Analyst   Oct-2021 - Oct -2022
Ezecom

Most of my responsibility as a business intelligence analyst at Ezecom is reporting in order to answer business questions and track business performance. At Ezecom I experienced a lot with BI tools, databases, unstructured data, SQL, and Problem Solving.

iOS, Web Developer   2020 - 2021
KOSIGN

Working as an IOS Developer I spend a lot of time in other to design app flow, UX/UI, and implementing iOS apps, I know the development life cycle of developing web and mobile apps, And I have experience with leading the team with the purpose to deliver great products to clients

Technical Support   2018 - 2019
VISCO

Related to networking and IT support. My responsibility is dealing with config networking devices and dealing with end users' problems. I know the way to deal with end-user and provide them the solutions on time, It teaches me to understand customer behavior quickly,
